SHADOWHQ

VIRTUAL BUNKER FOR OUT-OF-BAND CYBER CRISIS MANAGEMENT

ShadowHQ Playbook Manager

Automated cyber incident response playbooks for faster recovery

CISOs and Security Ops

Shift from reactive firefighting to proactive, standardized responses.

BCP and Continuity Teams

Navigate disruptions with digital playbooks at your fingertips.

Auditors and Compliance Officers

Ensure consistent, document and audit-friendly playbook execution.

How does it work?

When every second counts, manual playbooks create bottlenecks. ShadowHQ Playbook Manager digitizes and automates your response protocols—triggering tasks, assigning roles, and initiating actions at the push of a button.

CENTRALIZE PLAYBOOKS
Host digital, role-based playbooks accessible anywhere—securely.

AUTOMATE WORKFLOWS
Instant execution of tasks, notifications, and escalations.

EDIT & EXPORT
Update playbooks anytime; export for offline access or audit.

COMPLIANCE TRACKING
Audit trails and time-stamped logs document every step taken.

GET MULTI-DEVICE ACCESS
Secure desktop and mobile support—no more hunting for files.

PREPARE & PLAN
Build digital playbooks with defined roles, steps, and triggers.

ACTIVATE
At incident start, launch the playbook with one click (or API).

EXECUTE
Assign tasks, send alerts, create artifacts—all automated and tracked.

AUDIT & LEARN
Export logs and reports to analyze performance and maintain compliance.

Go from breach to containment faster with ShadowHQ

Why ShadowHQ

Speed & Accuracy
Automating manual processes accelerates response and reduces errors.

Security First
Operating out-of-band, it stays resilient even during network compromise.

Integrated Platform
Playbooks, communications, tasks—all inside one secure, SOC 2 Type II certified workspace.

Compliance-Ready
Built-in logging, exportable playbooks, and structured workflows support regulatory needs.

Stay in Control When Attacks Hit

The moment attackers compromise your SSO and corporate systems, traditional document storage and coordination tools like Slack, email, and Teams become useless. ShadowHQ is built for this exact scenario.

- ✓ **Out-of-band** by design.
- ✓ **Secure response activation** in minutes.
- ✓ **SOC 2 Type II certified** for peace of mind

While others scramble to regain access, you're already coordinating, executing, and communicating—securely and confidently.
